

CONTRO VALVE

Safety Valve Technician

Skilled position that understands the purpose and principles of operating pressure relief valves. Will eventually be responsible for servicing and certifying safety and safety relief valves on-site and in the shop. Will be required to work in remote locations from time to time – as such the ability to travel with little or no notice is a requirement. Must also be available to work on the road several days in a row.

Contro Valve has a comprehensive training program that includes three levels of factory training.

This position offers great career opportunities.

Requirements:

- Must have a good mechanical aptitude
- Must have excellent analytical skills
- Must be in good physical condition
- May work in confined spaces (ie. tanks, between compressors, vessels) and at heights.
- Ability to withstand, on occasion, difficult conditions (heat, dust, noise)
- Must have a valid driver's license
- Must be able to work well with all levels of the company and customers
- Ability to adapt quickly with different teams
- Must be able to work scheduled and unscheduled overtime
- Maintain a professional demeanor
- A knowledge of valve instrumentation, including the ability to assemble, disassemble, and repair would be an asset
